I am happy to see the edited book 'Contemporary Issues in Human Resource Management' Volume II at the end of this year. The book has varied themes related to Human Resources pertinent to the modern business environment, covering vast areas from analytics to performance management, from organization to spiritual leadership and from outsourcing to Grievance mechanisms. It also covers gender-related issues like women's harassment at the workplace, social issues like Cross-cultural sensitivity and environmental concerns in the form of a Green economy.

The book covers around 26 research papers, and editors have also aptly incorporated papers in *Devnagri Lipi*. Looking through the pattern of the papers incorporated in the current volume, it has been observed that researchers have focused on CSR concerns, Ecological concerns, and Economic concerns along with the HR practices of the current century. As the modern businesses require modern solutions, in the same way, modern HR practices require modern tools of analytics, which the researchers have incorporated in the present volume.

The effort of editors is visible in bringing out this volume by selecting papers from different sub-sections of the human resource and it is plausible from my side. My sincere thanks to all the editors of the title namely, Dr. Arun Kumar, Dr. Ravish Chandra Verma, Dr. Brajesh Kumar, and Dr. Sonali Sajjan for taking care of modalities in selection of the research paper with

Abstract

This chapter investigates the transformative impact of Human Resource Information Systems (HRIS) on organizational human resource (HR) practices. With HRIS increasingly becoming integral to HR functions, this chapter explores its evolution, key functionalities, and the challenges organizations face during implementation. Through qualitative research, including interviews and case studies, this chapter aims to illuminate how HRIS enhances operational efficiency, supports strategic decision-making, and influences employee engagement. The findings suggest that while HRIS offers significant advantages, careful consideration of implementation challenges is essential for successful integration. Future implications highlight the need for ongoing research in HRIS development and its strategic alignment with organizational goals.
