AUTOMATIC CONTROL SYSTEMS

(with Matlab Programs)

ABOUT THE BOOK

The main objective of this book is to provide a comprehensive coverage and more depth of text to the students to understand the basic principles of Automatic Control Systems. Each chapter is supported by a large number of solved examples in a sequential manner and step by step procedures for solving the problems are provided. Unsolved examples and semi-objective questions are given at the end of each chapter and some more solved examples are added. MATLAB has widely used software throughout the world. Selected examples are solved with MATLAB.

ABOUT THE AUTHOR

Syed Hasan Saeed received B.E. from Aligarh Muslim University, Aligarh and Ph.D. from Integral University Lucknow. Presently he is Professor and Head of the Department of Electronics and Communication Engineering, Integral University, Lucknow. He is in teaching profession for more than one decade now and also having Industrial Experience. He has published research papers in reputed journals, national and international conferences. He had published books on Automatic Control System, Control System, Control System-I and co-authored of Electromagnetic Field Theory, Basic System Analysis, Electrical Machine and Control System.
