CHAPTER 1 THE INTERSECTION OF PHARMACEUTICAL AND COSMETIC TECHNOLOGIES	1
<i>Abdul Hafeez, Syed Misbahul Hasan, Shom Prakash Kushwaha, Archita Kapoor, Nargis Ara, Ghazala Noor and Ambreen Shoaib</i>	
INTRODUCTION	2
CHALLENGES IN THE DEVELOPMENT OF COSMETICS	4
CONCEPT OF PHARMACEUTICAL TECHNOLOGIES IN THE COSMETICS	5
Microemulsions	7
Liposomes	7
Niosomes	8
Solid Lipid Nanoparticles	8
Nanostructured Lipid Carriers	9
Nanocapsules	9
Dendrimers	9
Nanoemulsion	10
Cubosomes	11
PHARMACEUTICAL TECHNOLOGY-MEDIATED COSMETICS WITH APPLICATIONS	12
Niosomes	12
<i>Anti-aging and Skin Whitening</i>	12
<i>Anti-Scarring</i>	14
<i>Herpes Labialis</i>	15
<i>Hair Serum</i>	15
Liposomes	16
<i>Anti-aging Formulation</i>	16
<i>Hair Care</i>	17
<i>Wrinkles</i>	17
<i>Acne</i>	17
<i>Psoriasis</i>	18
Solid Lipid Nanoparticles	18
<i>Sunburn</i>	18
Nanostructured Lipid Carriers	18
<i>Anti-aging and Antioxidant Effect</i>	18
Nanocapsules	19
<i>Anti-aging and Sunburn</i>	19
Dendrimers	19
<i>Antioxidant, Antibacterial and Anti-aging</i>	19
Nanoemulsions	19
<i>Skin Whitening</i>	19
<i>Sunburn</i>	20
Cubosomes	20
<i>Acne and Anti-aging</i>	20
<i>Silver and Gold Nanoparticle</i>	20
<i>Anti-dandruff</i>	20
<i>Leishmanicidal</i>	20

<i>Antioxidant, Skin-lightening, and Sunscreen</i>	21
Micelles	21
<i>Antifungal</i>	21
CONCLUSION	21

² Department of Chemistry, Integral University, Dasauli, Lucknow, Uttar Pradesh, India

Abstract: Hair care has evolved significantly due to advances in pharmaceutical technology. This abstract highlights recent developments in hair care products, focusing on their integration with pharmaceutical technology to effectively address various hair-related concerns. Advanced drug delivery systems tailored for scalp application enable targeted delivery of active ingredients, maximizing therapeutic effects. Nanotechnology, including nanoemulsions and nanoparticles, enhances ingredient solubility and bioavailability in formulations. Personalized solutions for scalp conditions such as dandruff and hair loss have emerged from extensive research, offering tailored treatment options. Multifunctional formulations cleanse and condition hair and provide therapeutic benefits like scalp nourishment and environmental protection. Novel delivery systems like microencapsulation prolong ingredient efficacy. Furthermore, pharmaceutical technology has played a pivotal role in the development of personalized hair care solutions. Through extensive research, scientists have gained insights into the complex mechanisms underlying various scalp conditions, such as dandruff, hair loss, and scalp inflammation. This knowledge has paved the way for the customization of hair care products tailored to individual needs, offering targeted treatment and optimal results. Continued research promises further advancements in formulation design and delivery systems, offering even greater efficacy in meeting diverse hair care needs. In conclusion, the synergy between hair care and pharmaceutical technology has revolutionized the landscape of hair care products. With continued research and innovation, further advancements in formulation design and delivery systems are anticipated, promising even greater efficacy and versatility in addressing diverse hair care needs.

Keywords: Alopecia, Formulation, Hair loss, Hair care, Hair, Nanotechnology.
